

**CO₂ MISCIBLE OPTIMIZED HYDROCARBON BLENDS AND
METHODS OF USING CO₂ MISCIBLE OPTIMIZED
HYDROCARBON BLENDS**

ABSTRACT

[0029] A method of treating a subterranean formation comprising the steps of providing a servicing fluid comprising carbon dioxide and a hydrocarbon blend, wherein the hydrocarbon blend comprises at least about 65% hydrocarbons having from six carbons (C₆) to eleven carbons (C₁₁); and placing the servicing fluid into the subterranean formation. A subterranean servicing fluid comprising carbon dioxide and a hydrocarbon blend wherein the hydrocarbon blend comprises and at least about 65% hydrocarbons having from six carbons (C₆) to eleven carbons (C₁₁).
